GPM Eliminator™
MADE TOUGH

PROUDLY MADE
IN THE USA

Made Tough™ in the USA

Tariffs don't have to disrupt your operations—GPM has you covered with American-made reliability and pump solutions manufactured right here in the USA.

Choose Domestic Production. Choose GPM.

GPM's Made Tough™ pumps eliminate repetitive pump failure to decrease the need for costly repairs and replacements, but the savings don't end there.

At GPM, the customer always comes first—which is why we choose domestic production every time. We engineer, manufacture, and service our GPM-Eliminator™ slurry and dewatering pumps at our headquarters in Northern Minnesota using USA-sourced components and pump materials, so you don't have to worry about tariff-related price increases.

The Made Tough Difference:

- Pumps made and serviced in the USA
- No unexpected price increases related to tariffs
- USA-sourced components and materials
- Quick lead times with models in stock and ready to ship

GPM-Eliminator:

- Oversized shaft and bearing design prevent deflection to extend motor and mechanical seal life
- Ability to handle up to 70% solids
- Unique spray hole technology keeps solids suspended, eliminating solids buildup in the sump
- Class-H insulated inverter duty motor with run-dry capabilities
