Ampco Pumps Company has been providing quality pumps to sanitary, marine and industrial markets worldwide for more than 60 years. Based on our commitment to deliver quality products, excellent customer service and competitive pricing to our customers, we have become the preferred pump provider for some of the most recognized companies in the world.

In 1995 Ampco Pumps Company came under new ownership and shifted its direction to develop product advantages for the sanitary pump industry. That shift in focus has resulted in tremendous growth over the past 20 years.

Ampco Pumps Company's corporate headquarters, manufacturing, and assembly facility is located in Glendale, Wisconsin. Additional facilities include; pump re-manufacturing centers located in Milwaukee, Wisconsin and Stockton, California. Ampco GmbH is a sales, light fabrication and assembly facility located in Herxheim, Germany.

By redefining engineered excellence, Ampco offers the most complete line of pumps, blenders and mixers in the industry.

We invite you to visit our facility in person and allow Ampco to show you how we engineer and manufacture the best sanitary pumps in the world!

Ampco Advantage

Ampco Pumps Company offers the most complete line of sanitary centrifugal pumps, positive displacement pumps, dry blenders and powder mixers in the industry. Providing pumps for the sanitary, marine and industrial markets worldwide since 1948, Ampco provides highly engineered advancements, many standard material upgrades, and the best delivery times in the industry.

Significant material upgrades are included in Ampco's competitive pricing, including a stainless steel gearcase on each new positive displacement pump. Ampco keeps a large inventory supply to ensure prompt deliveries; standard pumps are built and shipped within two weeks of ordering. All pumps are tested to customer specifications prior to shipment.

All of Ampco's products are manufactured, assembled and tested in our newly expanded 64,000 square foot facility in Glendale, Wisconsin. The remanufacturing centers located in Milwaukee, Wisconsin and Stockton, California completely remanufacture pumps to "as new" performance and appearance within two weeks. Remanufactured pumps include all new internals, performance testing and a full one-year factory warranty.

Ampco Pumps Company,
"redefining engineered excellence"

The designs of competing pumps have not changed in decades. When material upgrades aren't sufficient, we innovate: The patented ZP3 and patented ZP1+; AC+ centrifugal pumps; LH close-coupled, and high pressure centrifugal pumps are all examples of the Ampco Advantage. We invite you to see for yourself why Ampco Pumps Company is truly the best sanitary pump manufacturer in the world.

BREWERY / BEVERAGE PRODUCTS

Ampco Pumps offers a line of brewery and cellar products specifically designed with the users in mind.

The ROLEC DH hop induction system is available in 3 model sizes and is designed to offer everything needed to safely and efficiently dry hop beer in one fully portable unit. Pellets are reduced to the proper size utilizing Ampco's SBI shear pump allowing for maximum exposure, aroma, and flavor profiles in fermenting, crashed or finished beer. vContact Ampco today to schedule a trial.

Designed specifically for the craft beer industry the CB+ Craft Brew Pump allows brew masters the ability to focus on their next signature brew rather than deal with leaking pumps. The CB+ features an internal

seal design that promotes cooling and the reduction of product buildup on seal faces. The CB+ is dimensionally and hydraulically interchangeable with AC, AC+ and the competing C Series pumps. Contact Ampco's technical sales team today to see how the CB+ can benefit your brewing process.

Ampco offers a complete line-up of beer and must carts in several standard model sizes. Sanitary, robust, and designed for maximum mobility Ampco's carts will withstand the harsh conditions and confining work spaces of today's breweries and wineries. Several options are available, contact Ampco's technical sales team today to determine which model best suits your application.
