

Proven Reliable Quality

Since 1965, Premier Equipment (PEC) has served the Gulf Coast's Upstream, Midstream and Downstream markets. PEC is everything from an equipment distributor to a full turnkey design and construction company. PEC represents industry leading brands in pumps, air compressors, blowers, cooling towers, and epoxy grout. In conjunction with our sister company, Premier Control Systems, PEC offers customers turnkey design build services on facilities in the oil and gas industry. Premier Control Systems is a full service I&E company with a custom panel shop, programming, and field service capabilities.

Since 1965 Premier Equipment has served the Upstream, Midstream and Downstream projects. Premier is everything from an equipment distributor to a full turnkey design and construction company.

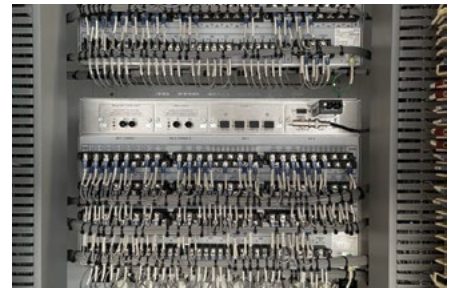

Equipment Packaging

Premier can package process equipment such as Pumps, Blowers, Compressors, Metering Skids, and Chemical Injection Packages.

Control Systems

Premier Designs, Builds, and Programs Electrical and Pneumatic Panels. Premier has Field I&E Groups positioned from Midland Texas to Houma, Louisiana for any installation or maintenance needs.

Facility Design and Construction

Premier Equipment along with sister company Premier Controls Systems offers custom oil & gas facility design/build services. Premier can handle every detail of the project from design, procurement, project management, and field installation. Our goal is to help clients complete projects on time and on budget while keeping a strong focus on safety.
