

ePUMPS SERVICE AND REPAIR SOLUTIONS

ePUMPS is your engineered solutions provider for pumps, seals, valves, mixers and service in Oklahoma and Texas. World-class pumps and products combined with our expert service technicians support your rotating equipment with cost-effective solutions.

MAINTENANCE

From repairs and rebuilds to final installation, each technician is factory trained and certified through OEM training and equipped to provide service-designed solutions for any application.

ENGINEERING SERVICES

Our engineering staff is the bridge between factory designed engineering and real world applications. We help you choose the right pump for maximum life and lowest cost of ownership.

FIELD SERVICE

ePUMPS team of experienced field technicians can service the pumps in your plant or the field with the goal of getting the equipment back to peak performance. Our technicians follow the industry's most rigorous installation standards, so you can be confident that your critical equipment is installed and commissioned correctly and safely.
